List of higher education institutions in the Slovak Republic (01/09/2019)	76

Dear readers and colleagues,

It is my pleasure to present the fifth edition of our publication mapping and presenting higher education landscape in Slovakia. The main aim of this activity is to inform our international partners, including students and their parents about structures and developments in the Slovak higher education system in the last years and about current activities of Slovak universities and schools of higher education. We present activities in education, science, research and arts that were regarded by the institutions themselves as the mostly interesting and valuable.

The mission of the Slovak universities and schools of higher education, as set by the law, is to develop and cultivate knowledge, wisdom, goodness and creativity and contribute to the development of education, science, culture and health for the welfare of the whole society. The academic tradition in Slovakia is dating back to medieval ages when *studium generale* was established in present Bratislava in 1465 within the capacity of *Universitatis Istropolitana*. The university tradition continued with the Jesuits universities in the 17th century in the royal towns of Trnava and Košice, the only functional universities in Hungarian kingdom at that period. Later the Miner's Academy was established in Banská Štiavnica (1762) as one of the most modern technological schools in this era. In the next centuries the above-mentioned universities were moved to other parts of the Hungarian kingdom outside present Slovakia. Modern universities were founded after the establishment of the Czechoslovak republic. This year we commemorated 100th anniversary of the establishment of the Comenius University in Bratislava (1919), that is the oldest and biggest of present Slovak universities.

At present, there are 20 public, 3 state and 12 private universities and schools of higher education in Slovakia. Seven of them were labeled as research universities by the Ministry of education, science, research and sports of the SR this year. These were the Comenius university in Bratislava, the Pavol Jozef Šafárik university in Košice, the Slovak university of technology in Bratislava, the Slovak university of agriculture in Nitra, the Technical university of Košice, the Technical university in Zvolen and the Trnava university in Trnava. But there are many more comprehensive, technical and other specialized schools of higher education that offer quality education and perform quality research at its scientific parks, centres of excellence, research centres, competences centres. There were identified 54 teams at Slovak universities by the Slovak Accreditation Committee in the previous period, that performed excellent research and artistic activities. Slovakia has joined European Higher Education Area in 1999 and has implemented Bologna process from on. Slovakia has also signed and ratified The Convention on the Recognition of Qualifications concerning Higher Education in the European Region.

Dr. h. c. prof. Ing. Rudolf Kropil, PhD.

President of the Slovak Rectors' Conference

About the Slovak Rectors' Conference

Slovak Rectors' Conference (SRC) is one of the three bodies representing higher education institutions in Slovakia according to law No. 131/2002 of the Law code on higher education. The main aim of SRC is to coordinate and promote activities of rectors in order to create a common higher education policy. Among these main activities one can find discussions and formulations of opinions on substantive issues related to the higher education policy, proposals of generally binding legal norms that are directly affecting higher education institutions or applicable legal standards. SRC creates an environment for cooperation of rectors and of universities and schools of higher education in Slovakia and for mutual flow of information among them. Furthermore, SRC establishes and maintains contacts with foreign partners as are rectors' associations in other countries. SRC is a collective full member of the European University Association ("EUA").

The Slovak Rectors' Conference is represented by its president Professor Rudolf Kropil. The presidium is an executive body that consists of a president and up to four vice-presidents, at present Professor Lucia Kurilovská, Professor Pavol Sovák and Professor Libor Vozár.

Over the past years, SRC has coordinated its activities around topics that were considered to be of the highest importance for rectors and their institutions: quality assurance and enhancement, funding and legal frameworks, or science, research and arts at higher education institutions.

Higher education system in the Slovak Republic

The general prerequisite for admission to higher education study is a secondary school-leaving certificate (vysvedčenie o maturitnej skúške) issued after passing the secondary school-leaving examination taken upon completing 13 (or, exceptionally, 12) years of study. Higher education institutions organise as a rule an admission examination.

Study at higher education institutions

Higher education institutions provide study programmes at three levels:

1. Bachelor's study programme with a duration of three or four years in full-time mode and four or five years in part-time mode.
2. Magister's, Engineer's and Doctor's study programmes. The duration of study is one, two or three years in full-time mode and two, three or four years in part-time mode. They may also be provided as integrated study programmes combining the first and the second level of higher education. The duration of study programmes combining the first and the second level of higher education is five or six years in full-time mode and seven or eight years in part-time mode.
3. PhD. study programme. The standard duration is three or four years in full-time mode and four or five years in part-time mode.

Higher education institutions award the following academic degrees:

1st level (NQF/EQF Level: 6)

- bakalár (Bc.)

2nd level (NQF/EQF Level: 7)

- magister (Mgr.), in the field of art magister umenia (Mgr. art.)
- inžinier (Ing.) in technical, agricultural and economic fields of Engineer's programmes, and in the field of architecture and town-planning the academic degree of inžinier architekt (Ing. arch.)
- doktor všeobecného lekárstva (MUDr.) in the field of general humane medicine
- doktor zubného lekárstva (MDDr.) in the field of dentist humane medicine
- doktor veterinárskeho lekárstva (MVDr.) in the field of veterinary medicine

3rd level (NQF/EQF Level: 8)

- doktor – philosophiae doctor (PhD.)
- doktor umenia – artis doctor (ArtD.)
- licenciát teológie (ThLic.) after completing the first comprehensive part of the PhD. study in the field of catholic theology

Examina rigorosa

The holders of the academic degree of magister may take examina rigorosa, which includes the defence of a rigorosa thesis. After its successful completion, higher education institutions award the following academic degrees:

- doktor prírodných vied (RNDr.)
- doktor farmácie (PharmDr.)
- doktor filozofie (PhDr.)
- doktor práv (JUDr.)
- doktor pedagogiky (PaedDr.)
- doktor teológie (ThDr.)

Credit system (since academic year 2002/2003)

The standard workload of a student studying in full-time mode is expressed as 60 credits per academic year, 30 credits per semester and 20 credits per trimester. The standard workload of a student studying in part-time mode is expressed as 48 credits maximum, depending on the standard duration of the study programme and the number of credits required for its completion.

The grading is on a scale of A-FX:

- A (excellent) = 1 (outstanding performance)
- B (very good) = 1,5 (above average performance)
- C (good) = 2 (average performance)
- D (satisfactory) = 2,5 (acceptable performance)
- E (sufficient) = 3 (performance fulfils only the minimum requirements)
- FX (unsatisfactory) = 4 (performance does not fulfil even the minimum requirements)

The higher education institution or faculty, if the study programme is provided by a faculty, may in selected subjects decide not to assign grades to assess students but to set other criteria for the successful completion of subjects as a condition for the award of credits.

A weighted grade point average is used to measure a student's overall academic performance in a given period of time. It is calculated for a given period of time by dividing the sum of credits earned by the student for all registered subjects, each multiplied by the numerical value of the grade received for each subject, by the total number of credits registered by the student in a given period. Subjects not completed by the student are assigned a grade of 4 in the calculation of the weighted grade point average. The subjects not assessed by grades are not included in the calculation of the weighted grade point average.

The academic year starts on September 1 of the current year and ends on August 31 of the following year. It is composed of two semesters (winter and summer) or of three trimesters. The organisation of the academic year is set by the statute of the

faculty or the statute of the higher education institution, if the higher education institution is not divided into faculties.

Comenius University in Bratislava

Address

Šafárikovo nám. 6, SK – 814 99 Bratislava

Established in 1919

SHORT DESCRIPTION: Comenius University in Bratislava is a modern European university. The centennial of its establishment was celebrated in 2019. It is the only Slovak university to regularly appear in global rankings of the world's best universities. The university has thirteen faculties and provides the largest number of study programmes (more than 800) in Slovakia at three levels. Several of these programmes are unique in the country. The university provides tuition in a wide range of human knowledge, in medicine, humanities and the social sciences, the natural sciences, mathematics, and even theology. Comenius University is a research institution which supports hundreds of domestic and international scientific projects. Every year Comenius University sends the largest number of students abroad from among Slovak universities. They go to around fifty countries. Comenius University also hosts the largest number of students in Slovakia, with students coming from places such as Germany, Norway, Greece, Iran, Austria, and Iceland.

LIST OF FACULTIES:

- Faculty of Medicine
- Faculty of Law
- Faculty of Arts
- Faculty of Natural Sciences
- Faculty of Education
- Faculty of Pharmacy
- Faculty of Physical Education and Sport
- Jessenius Faculty of Medicine in Martin
- Faculty of Mathematics, Physics, and Informatics
- Faculty of Roman Catholic Theology of Cyril and Methodius
- Evangelical Lutheran Theological Faculty
- Faculty of Management
- Faculty of Social and Economic Sciences

SCIENTIFIC RESEARCH, INTERNATIONAL RELATIONS, PROJECTS: Comenius University ranks among the top 2% of the world's best universities, as evidenced by its placement in global rankings such as URAP, CWUR, RUR, THE WUR, and others. The highest concentration of top scientific teams in Slovakia operates at the university. The top twenty-six scientific teams at Comenius University passed a multi-level evaluation and met the Accreditation Commission's demanding criteria, and they form almost half of the 54 teams at all Slovak universities. Scientific centres at

the university include the Comenius University Science Park, which aim is to transfer the results of science and technology in the fields of biomedicine, biotechnology, environmental medicine, and interdisciplinary research into economic and social practice. There is also the Laboratory of Advanced Technologies, which focuses on research into biomaterials, sensorics, superconductivity, and hard films and coatings; the BioMed Martin Centre for Biomedicine, which has excellent instruments focusing on applied research; and the Centre for Nuclear and Accelerator Technologies.

The university is also strengthening its international profile through its active membership in international organizations such as the European University Association, the Network of Universities from the Capitals of Europe, the Utrecht Network (a network of prominent European universities), and the Danube Rectors' Conference. The university's faculties are involved in several Horizon 2020-funded projects dealing with the natural sciences, physics, law, the social sciences, and the humanities. In 2018 Comenius University projects were funded to a total of €9,555,810. Domestic grants came primarily from the Slovak Research and Development Agency, which supported 231 projects based at Comenius University in 2018, as well as the Scientific Grant Agency of the Ministry of Education, Science, Research, and Sport of the Slovak Republic and the Slovak Academy of Sciences, which supported 343 such projects. Alongside the Slovak University of Technology in Bratislava, Comenius University is part of the Accord project, worth €111 million, which is part of the Research and Innovation operational programme's financial plan approved by the Slovak Government and the European Commission to improve university capacity and competences in research, development, and innovation.

Pavol Jozef Šafárik University in Košice

Address

Šrobárova 2, SK – 041 80 Košice

Established in 1959

SHORT DESCRIPTION: The Pavol Jozef Šafárik University in Košice is public and research oriented university and as the second oldest classic university in Slovakia was established in 1959 developing the tradition of the Universitas Cassoviensis founded in 1657. At present, the university provides education to more than 7,000 students in 105 BA, 73 MA and 45 PhD programmes. The university offers also interdisciplinary certified courses to promote the openness and connectedness of the study programmes. The students can also use the services of the University Library, the Centre for Information and Communication Technologies and the Botanical Garden. The university has more than 2,500 accommodation places and catering services near the city centre.

SCIENTIFIC RESEARCH, INTERNATIONAL RELATIONS, PROJECTS: Composed of five faculties, the Pavol Jozef Šafárik University (UPJŠ) also embodies the multiculturalism that Slovakia values deeply. Of its 7,000 students, around 20% are from more than 50 countries across the globe.

Among the benefits of studying at UPJŠ is the possibility of obtaining a double degree with one of UPJŠ's more than 200 partner universities around the world. This extensive network of partners has helped to raise the global profile of the university, which is ranked among the country's top 3. UPJŠ also takes pride in the strength of its interdisciplinary research and transfer of technology that results from that research, apart from the intellectual property protection in which its Faculty of Law excels in collaboration with the private industry, the university set up science parks for biomedical research (MediPark), information technology (TECHNICON), the Research Centre for Advanced Materials and Technologies (Promatech), and the Technology and Innovation Park. The university also has an established support system for start-up and spin-off companies, thanks to the rapid growth of those sectors in Košice and the surrounding region.

SCIENTIFIC RESEARCH, INTERNATIONAL RELATIONS, PROJECTS:

The STU is a research-oriented university with strong cooperation with industry and international relationships significantly contributing to development of scientific knowledge, enrichment and utilisation of scientific knowledge for the benefit of mankind. The university pursues research in all the areas in which university education is provided.

The STU faculties, departments, institutes and experts cooperate directly with industrial companies and social and academic organisations, actively taking part in international cooperation. Research greatly enhances the educational and research activities by reflecting the current need to provide unique solutions to the acute engineering problems and accelerate transfer of knowledge. Research activities of the university are financially secured by national science and research programmes. The university also takes opportunity to join European science and technology cooperation programmes, primarily from the Framework Programme of the EU for research and innovation – Horizon 2020.

Slovak University of Agriculture in Nitra

Address

Tr. A. Hlinku 2, SK – 949 76 Nitra

Established in 1952

SHORT DESCRIPTION: The Slovak University of Agriculture in Nitra (SUA) is a public university that has been preparing specialists across the agrarian and food sector since 1952. In 2015, the Accreditation Commission ranked SUA among the seven best universities in Slovakia. In 2019, SUA is one of 7 “research universities” in Slovakia. According to the current worldwide evaluation of SCIMAGO Institutions Rankings 2019, SUA is the third best university in Slovakia out of 14 evaluated universities. SUA is also ranked by Times Higher Education World University Ranking.

Educational and research profile of SUA is characterized by the main pillars of classical fields of study in agriculture and landscaping, food industry, biology, biotechnology, engineering, ecological and environmental sciences, economics and management. There are 104 accredited study programmes, twelve of them in English.

LIST OF FACULTIES:

- Faculty of Agrobiology and Food Resources
- Faculty of Biotechnology and Food Sciences
- Faculty of Economics and Management

**SCIENTIFIC RESEARCH,
INTERNATIONAL RELATIONS,
PROJECTS:**

Scientific research orientation of SUA covers a wide range of agricultural, technical, social and economic sciences in the field of basic and applied research. The AgroBioTech Research Centre plays a significant role as a university-wide, specialized facility which performs concentrated innovative research in the relevant fields aimed at conducting new methods and procedures in research, especially within applied research, with the important goal of transferring its results into practice. In the area of project activities, SUA is involved in a wide range of both educational and research projects including HORIZON 2020 programme. The university has 180 bilateral agreements within the Erasmus+ Programme and 113 inter-university cooperation agreements worldwide. SUA is a member of the Global Consortium for Higher Education in Agriculture, European University Association, Danube Rectors' Conference, Association for European Life Science Universities and is a founding member of Visegrad University Association. SUA also cooperates with OECD.

SCIENTIFIC RESEARCH, INTERNATIONAL RELATIONS, PROJECTS:

The Academy of Performing Arts has three major art scenes (LAB Theatre, Klap Cinema and Dvorana Concert Hall), open to the public, presenting the results of artistic and scientific research. Every year it offers about 350 public events for more than 20,000 visitors. Research is also conducted at the Department of Audio-visual Studies at the FTF, the Department of Music Theory and Dramaturgy at the HTF, and the Department of Theatre Studies at the DF. Employees of the Academy are involved in many projects, cooperating with the Slovak Academy of Sciences, the Slovak Film Institute and the Theatre Institute and with several music and dance institutions. The projects are focused on the reflection of Slovak art, new trends in the arts and humanities and the history of Slovak art. Doctoral lecturers and students actively participate in research conferences, seminars, workshops, master classes and other artistic projects. The Academy has a cooperation agreement with 105 partner schools and is involved in the E + Mobility Program (including the KA7 Participating Countries Program), Erasmus Mundus and the E + KA2 Strategic Partnership Program.

The University of Veterinary Medicine and Pharmacy in Košice

Address

Komenského 73, SK – 041 81 Košice

Established in 1949

SHORT DESCRIPTION: University of Veterinary Medicine and Pharmacy in Košice (UVMP) is a public university offering the first and second joined degree study programmes in General Veterinary Medicine (study also in English provided to more than 280 foreign students), Food Hygiene and Pharmacy. University offers education of the first degree in Cynology, Man-Animal Relationship and its use in Canistherapy and Hipotherapy, and Safety of Feeds and Foodstuffs and related study programme of the second degree – the Market and Quality of Foodstuffs. Higher education of the third degree is provided in 14 accredited programmes. UVMP is an approved and accredited veterinary university according to the criteria of the European Association of Establishments for Veterinary Education (EAEVE). At the time of its accreditation, UVMP was included among only 12 veterinary establishments (out of 96 in total) which then enjoyed the same prestigious status. The university meets the EU standards and awarded diplomas are valid in all Member States of the European Union. The university offers its students a high level of practical preparation, and permanent diagnostic and medical contact with animals.

SCIENTIFIC RESEARCH, INTERNATIONAL RELATIONS, PROJECTS:

Scientific activities at UVMP in Košice are focused primarily on diseases of agricultural and companion animals, protection of the environment for animals and people, production of healthy, non-harmful foodstuffs and pharmaceutical research. A confirmation of the quality of scientific, research and educational activities of the university is its repeated evaluation by recognized authorities on the national and international levels. International cooperation is carried out in the framework of the university's active membership in the European Association of Establishments for Veterinary Education, the European Veterinary Network of Students Staff Transfer and Association of American Veterinary Medical Colleges.

Constantine the Philosopher University in Nitra

Address

Tr. A. Hlinku 1, SK – 949 74 Nitra

Established in 1959

SHORT DESCRIPTION: Constantine the Philosopher University in Nitra (UKF) is the sixth largest public university in Slovakia formed as a modern European educational, scientific and artistic institution. UKF currently offers 6 accredited single-major and 29 double-major teacher training study programs, 67 Bachelor's and Master's study programs and 36 Doctoral study programs. The uniqueness of UKF in education is represented by teacher training programmes in Hungarian and the training of teachers, social workers and public education for Roma ethnicity. The university also provides lifelong education particularly as complementary pedagogical study, extended study and interest study within the Third Age University.

LIST OF FACULTIES:

- Faculty of Arts
- Faculty of Central European Studies
- Faculty of Education
- Faculty of Natural Sciences

SCIENTIFIC RESEARCH, INTERNATIONAL RELATIONS, PROJECTS: The most significant international research projects are HBM4E – European Human Biomonitoring Initiative and SPOT – Social and Innovative Platform on Cultural Tourism and Its Potential towards deepening Europeanisation (financed under the H2020).

Research at UKF is funded and organized through the grant schemes:

- Institutional resources available in the University Grant Agency (UGA) for the employees under 35 years of age and PhD students in full-time study;
- Resources from the national grant agencies – APVV, VEGA and KEGA;
- Non-departmental resources – Ministry of Culture, Government Office and the institutions of the Nitra Region;
- International resources – FP7, Horizon 2020, Comenius, Erasmus+, International Visegrad Fund etc.;
- Resources from the EU structural funds and their operational programs.

UKF has 75 Bilateral Agreements of Academic Cooperation, 427 Erasmus+ bilateral agreements, sends and receives students and staff within the EU and national schemes of mobility programmes and agreements and guest teachers through British Council, Goethe Institute, French Institute, Fulbright Commission, DAAD etc.

University of Žilina

Address

Univerzitná 8215/1, SK – 010 26 Žilina

Established in 1953

SHORT DESCRIPTION: Taking into account both quantitative and qualitative indicators, the University of Žilina belongs to the most significant universities in Slovakia on a long-term basis. The university provides higher education in all three degrees of study – Bachelor's, Master's and Doctoral in both full-time and part-time forms. Its professional profile makes the University of Žilina unique among Slovak universities. It includes transport (road, railway, water, air), transport and postal services, communications, roadway and building construction, electrical engineering, telecommunications, informatics, information and communication technologies, management and marketing, mechanical engineering, materials and technologies, robotics, machinery design, energies, civil engineering, crisis and security management, civil security, fire protection, forensic engineering, applied mathematics, teacher training, library and information sciences, social pedagogy and high mountain biology. Approximately 85,000 students have graduated from the university. Almost 8,000 students are enrolled in all study programmes. The university has established contacts with many universities abroad (USA, Mexico, Brasil, China, Korea Japan...), its teachers and researchers participate in international education and research programmes, international, national and bilateral projects.

LIST OF FACULTIES:

- Faculty of Operation and Economics of Transport and Communications
- Faculty of Mechanical Engineering
- Faculty of Electrical Engineering and Information Technology
- Faculty of Civil Engineering
- Faculty of Management Science and Informatics
- Faculty of Security Engineering
- Faculty of Humanities

SCIENTIFIC RESEARCH, INTERNATIONAL RELATIONS, PROJECTS: The UNIZA research teams with about 688 researchers solve problems of basic and applied research on the national and international levels, with the support of the national research grants and in the international co-operation within the European and other international programmes (e.g. EU 7th Framework Programme, Horizon 2020). The research capacity of the university was 874 000 hours in 2018, which is equivalent to ca 437 full-time workers conducting some scientific research. Individual workplaces obtained for their projects 2 953 550 € from VEGA, KEGA and APVV

Academy of Fine Arts and Design in Bratislava

Address

Hviezdoslavovo nám. 18, SK – 814 37 Bratislava

Established in 1949

SHORT DESCRIPTION: The Academy of Fine Arts and Design in Bratislava (AFAD) is a public university. Its student's and department's work has been acclaimed not only in Slovakia, but also abroad. AFAD is a fully accredited university providing complete bachelor's and master's study programmes in the fields of Fine Arts, Design, Architecture and Restoration. In addition, the doctoral study programmes include the history and theory of Fine Arts and Architecture. Educational activities are based on contemporary trends and practices in the arts and sciences compounded with expert knowledge of techniques across a wide range of artistic activities.

AFAD is not structured into faculties but directly into twelve Departments and a Division of Drawing. This organisation structure enables the Academy to be flexible and open educational institution and to create the interdisciplinary educational environment.

SCIENTIFIC RESEARCH, INTERNATIONAL RELATIONS AND PROJECTS: AFAD is fully integrated in the international environment, which is demonstrated by student's mobility (Erasmus+ KA 103 and KA107, CEEPUS, bilateral agreements with

University of Economics in Bratislava

Address

Dolnozemska cesta 1, SK – 852 35 Bratislava

Established in 1940

SHORT DESCRIPTION: The University of Economics in Bratislava (EUBA) currently represents the biggest university in Slovakia which provides complex and integral education in economic and management study programmes at all levels of study.

“Since its establishment, the university’s aim is to be the centre of the economic education and knowledge in Slovakia. The education that is currently in high demand and that has had a long tradition at the university since 1940.”

The EUBA provides education in 61 bachelor’s, master’s and doctoral programmes for full-time and part-time students. All study programmes, including three study programmes which can be studied in English, French and German languages, are accredited and guaranteed by internal teachers of the university. They are compatible with study programmes of similar universities in Europe. This fact had also been confirmed by the results of international evaluation conducted by the European University Association, the member of which is the EUBA as well.

The university also pursues extensive international cooperation with more than 230 universities and colleges in the world and actively involves its teachers into scientific and research activities.

In the field of education, the EUBA aims to provide high-quality economic education particularly in engineering and doctoral study. This determines the university’s managing, but primarily content capacity in drafting forms and types of education, improving the qualification and performance of pedagogical staff and application of modern teaching and study methods for students. In accordance with these aims, the university’s management also adjusts and builds its organizational structure, i.e. faculties and workplaces in the new structure of fields of study and study programmes.

Bratislava International School of Liberal Arts

Address

Grosslingova 53, SK – 811 09 Bratislava

Established in 2006

SHORT DESCRIPTION: The Bratislava International School of Liberal Arts (BISLA) is a private school of higher education grounded in the humanities. The school offers a bachelor's degree study program. At BISLA, students do not memorize, but analyze, think and discuss. They are encouraged to evaluate facts in the context of diverse disciplines, ranging from political science, philosophy, and history to literature, sociology and art history; from Plato to Rorty, from Shakespeare to Kundera.

BISLA believes that when it comes to education, the smaller the better. Therefore, the school admits a maximum of 20 to 25 students into each class. A number of foreign students also study at BISLA every year.
